CODESOFT™

for R/3®

BAR CODE LABEL DESIGN AND
OUTPUT SOFTWARE FOR SAP® R/3®

CODESOFT™ for R/3®

The Most Powerful Label Design and Output Tool for SAP R/3.

Looking for the best way to output labels with high quality bar codes, text and graphics in SAP R/3 applications? CODESOFT for R/3 software provides you with an easy, cost-efficient method for converting a label design into a data format that uses SAPscript to print labels directly from R/3.

The most powerful design tool available—CODESOFT for R/3 integrates the label design process with output print files to create a format compatible with SAP R/3.

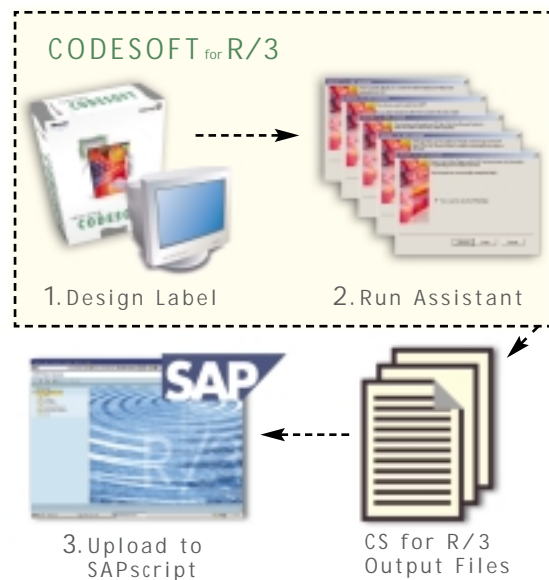

This is accomplished in 3 easy steps.

1. Design The Label. Label formats can be quickly and easily designed using CODESOFT's intuitive graphical interface which provides you with all the tools necessary to design a label that meets your standards.

2. Run the CODESOFT for R/3 Assistant. The Assistant is a simple step-by-step method for creating the files necessary to upload a label or form to SAPscript and to send it to a printer. Once the label design is complete, it is exported as a single ITF file or two files (one text file and one ITF), depending on the label design and printer in use. The text format used by SAP R/3 can then be interpreted for label printing.

3. Upload to SAPscript. Using the output files from CODESOFT for R/3 an integrator/SAP programmer can upload the ITF files into SAP to create customized—but flexible—output solutions without the need for middleware.

FEATURES	BENEFITS
Multiple Driver Support	Supports all bar code printers having a device driver in SAP R/3
CODESOFT Graphical User Interface (GUI)	Labels can be quickly and easily designed with an intuitive interface
CODESOFT Print Engine	The most powerful engine to output printer code
Flexible File Output Options	Optimizes print performance
Customizable Header and Footer Data	Save and re-use company specific SAPscript commands
CODESOFT for R/3 Assistant	Guides the user through the process of creating the proper output files for each label design

COST EFFECTIVE.

CODESOFT for R/3 is the most cost-effective method of designing and creating your own SAP-specific AIDC application—because TEKLYNX works continuously to ensure that all software is compatible with, and takes full advantage of, the latest changes in SAP technology.

THE MOST OUTPUT OPTIONS.

Only CODESOFT for R/3 software supports most bar code printers supported by SAP.

THE TEKLYNX GLOBAL ADVANTAGE.

Available in 22 languages and sold worldwide, CODESOFT software is from TEKLYNX, the world's largest automatic identification and data collection (AIDC) software publisher with truly global sales and support.
