SENTINEL™

PRINT PACK S/3 for SAP®

SETTING THE STANDARD

SAP - CERTIFIED BAR CODE LABELING AND INTEGRATION SOFTWARE

Introducing SENTINEL™ Print Pack S/3 for SAP®

Easily Design and Integrate Bar Code Labeling with SAP® R/3®.

Need to print bar code labels in an SAP R/3 environment?

If so, Teklynx—an SAP Software Partner—has created the most easily integrated, powerful, SAP-Certified solution on the market today—SENTINEL Print Pack S/3.

This innovative, SAP-Certified, technology makes integration easy—while allowing a data stream to be mapped to a label design and printed on a thermal or Windows®-based printer anywhere on the network.

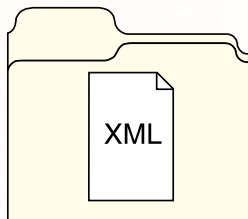

SENTINEL takes the advanced capabilities of SAP's Smart Forms XML and adds easy label design plus easy integration with SAP-generated data—making the SAP-Certified SENTINEL interface a must for any systems integrator and/or end-user needing to accommodate bar code label printing within an SAP environment.

SENTINEL Print Pack S/3 for SAP functions in six easy steps.

1. Enter label data into an SAP Smart Form.

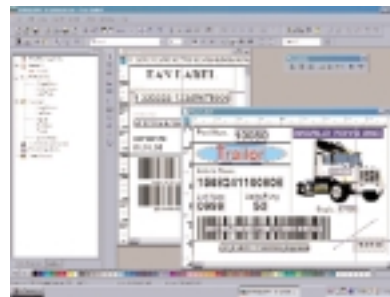

2. Direct the XML output to a folder/directory on your network.

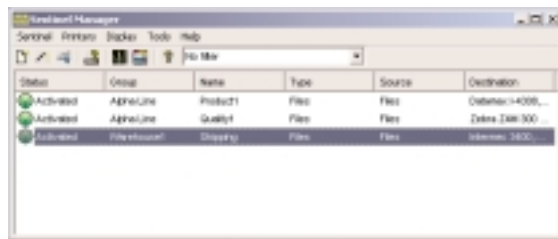

3. Run TEKLYNX Mapper to automatically map incoming SAP data.

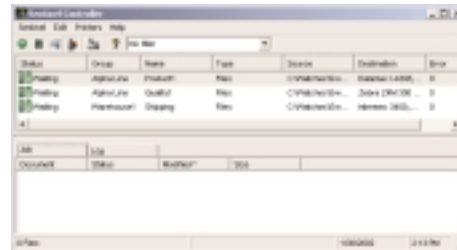

4. Click on the label design button and use drag-drop-functionality to create the label.

5. Use the SENTINEL Manager Wizard to manage label data from the XML folder/directory (See #2)

6. SENTINEL now automatically outputs labels from incoming SAP data.

SYSTEM REQUIREMENTS: SAP R/3 v4.6 OR LATER
