WEDGEWARE™

SETTING THE STANDARD

DATA ACQUISITION AND DELIVERY SOFTWARE

WEDGEWARE™ Easy, Flexible, and Accurate Data Acquisition and Delivery

WEDGEWARE data acquisition and delivery software captures serial or TCP/IP data, formats it to meet your needs, then inputs that data into any Windows application just as if someone had typed that information on a computer keyboard.

WEDGEWARE harnesses the power of keyboard wedge devices while giving you the flexibility to route data from any serial or TCP/IP device. And for more advanced data delivery needs, WEDGEWARE gives you the ability to use Visual Basic scripting for complete programmatic control over your data processing, application flow and navigation.

WEDGEWARE Routes Data From Any Serial or TCP/IP Device

- Bar code scanners
- Magnetic stripe readers
- Scales and balances
- pH/Electrochemistry meters
- Laboratory instruments
- Measuring machines
- Calipers and gauges
- And many more...

WEDGEWARE gives you the flexibility to route data from any serial or TCP/IP device

WEDGEWARE Allows You To . . .

- Collect real-time data from up to eight serial port connections and an unlimited number of TCP/IP connections.
- Run WEDGEWARE in three different modes – Wedge Mode, Script Mode or Automation Mode.
- Change WEDGEWARE configuration settings in "hands-free" mode using its user-definable Auto-Activation Codes.
- Use the "Virtual Device" option to easily simulate a data source device – very useful for testing purposes.
- Drive any ActiveX or OLE Automation compliant object from WEDGEWARE using the Microsoft Visual Basic Scripting Edition engine (included with WEDGEWARE).

SCRIPT	DESCRIPTION
AddPrefixSuffix	Adds prefix and suffix to data
AutomationToTextFile	Appends data to a Text file
AutomationToWord	Sends information to a new Word document
AutomationToWordAndExcel	Sends information to a new Word document AND a new Excel document
CheckDataIdentifier	Verifies that the scanned data begins with the correct characters
LaunchNotepad	Launches Notepad and sends scanned data after 5 seconds
ScaleToExcel	Reads weight from scale and sends to a new Excel document
StripData	Strips prefix and suffix off of scanned data
